Pre - Requisite

- Privileged User Database
- Employee Authentication Records
- Login Activity Logs
- Device Fingerprinting
- IP Address Tracking
- Location Information

- Role-Based Access Matrix
- Banking Server Logs
- AI Behavioural Training Dataset
- Secure Mobile Application
- SOC Dashboard
- Quantum-safe encryption library (Kyber/Dilithium simulation)

The Current Challenges

Banks rely on privileged employees such as database administrators, IT teams, and system operators who have access to highly sensitive customer and financial data. Traditional security solutions mainly focus on external cyberattacks, while insider threats often remain undetected due to excessive privileges, lack of business context, and fragmented monitoring systems. As a result, unauthorized access, data leakage, fraud, and delayed investigations become major security concerns.

Insider Threat

Privileged Access Misuse

Data Snooping

Alert Fatigue

Investigation Delays

Potential Insider Risk

WHAT MAKES INSIGHT DIFFERENT

Coercion Protection

Silent Duress Authentication

Employee safety matters

Business Context Intelligence

AI verifies business justification

Explainable Risk Analysis

Intelligent Investigation Support

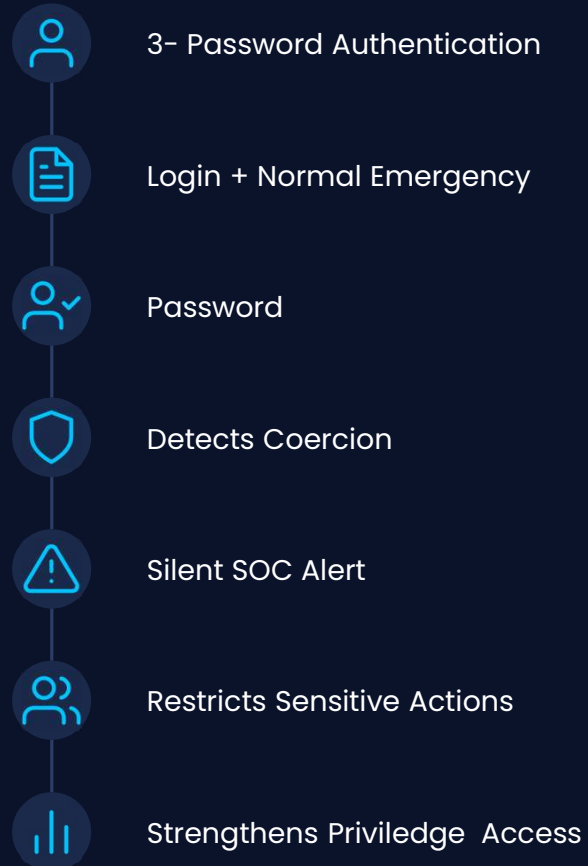

Solution - 1

Privileged Access Control Flow

DURESS PASSWORD MECHANISM

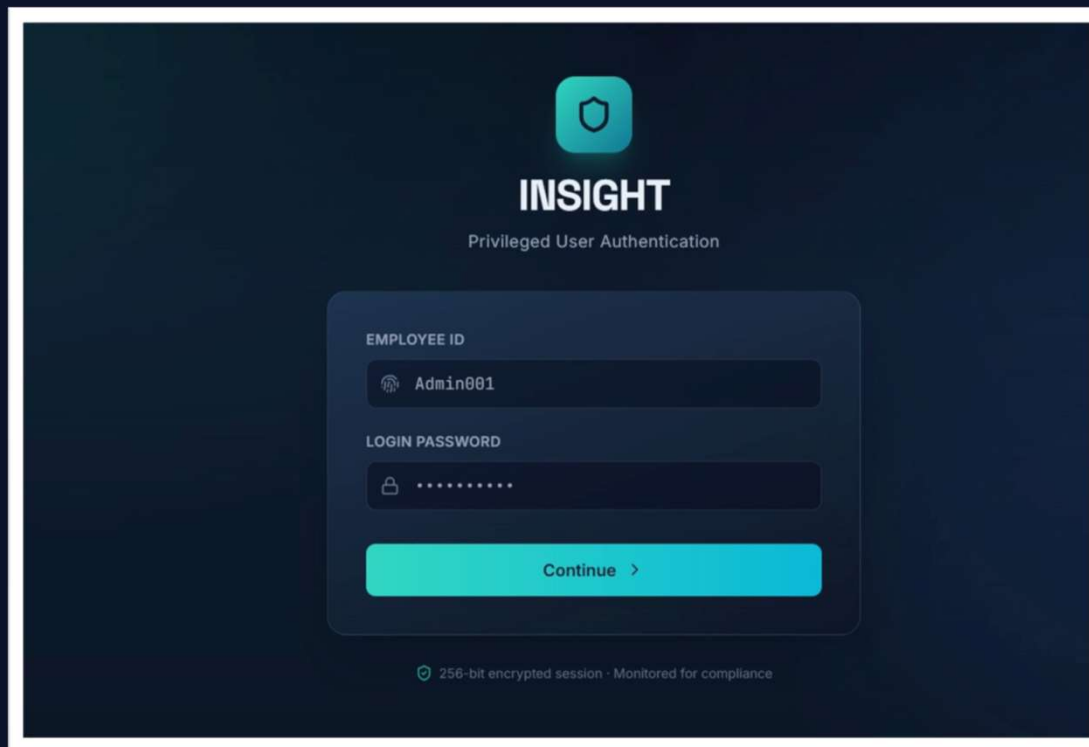

Covert Emergency Authentication enables employees under coercion to silently alert the Security Operations Center (SOC) while maintaining normal system behavior. This ensures rapid response without alerting the attacker.

Prototype

The image shows a login interface for 'INSIGHT Privileged User Authentication'. At the top, there is a teal shield icon with a white checkmark inside. Below the icon, the word 'INSIGHT' is written in a bold, white, sans-serif font. Underneath 'INSIGHT', the text 'Privileged User Authentication' is displayed in a smaller, lighter font. The main login area is a dark grey rounded rectangle containing two input fields. The first field is labeled 'EMPLOYEE ID' and contains the text 'Admin001' preceded by a small fingerprint icon. The second field is labeled 'LOGIN PASSWORD' and contains a series of dots preceded by a small lock icon. Below these fields is a large teal button with the text 'Continue >'. At the bottom of the login area, there is a small teal lock icon followed by the text '256-bit encrypted session · Monitored for compliance'.
